Co There is a general though not very well defined impression is this country that Rossin by tooms inexplicable affinity is or is destined to be our paternal ally in the country of the c ustural ally in the grand sivalry of nations.
Whether this impression is produced by the fact that Russia has reldom crossed the track of our laterests, whilst the other great powers are cross what faccinating spectacle of youth and energy and hope which Russia exhibite to the world, or whether it is suggested by something deeper and subtler than either, something in the magnetic core of things, certain it is that the Impression exist, and manifests itself very naequivocally, from the to time, as, for example, during the Crimean wer, and again in the Crimean wer, and again the crimean were against the crimean were considered to the contraction of the Dictionary as the best went of the Dictionary as the best well as such we of course teed not say a word. NICHOLAFISKY, AMOOR RIVER, June 12th, New Style, 1859 The Governor General, Count Morovieff, arrived bere from Liberia on the 11th inst, and to day, at 9 A M., all the merchants, toreigners, and linears, were, be previous notice, assembled to ment them at the bisyspec a bruse. out of the injustice done to American citizens | Terry seem to as unreasonable. ussian authorities some three years ago. This glance in afforded satisfactorily by the latter in hand. "Americans particularly," says the writer, "were invited and accouraged to settle at the then new tewn of Nicholasticy, and enter freely into nd excouragement, were held out to them by the of Siberia, to participate in the great enterprises projected by the Imperial Government for that territory. Free trade and free usvigation of the river

ca the part of the Americans were again and again promised and officially announced. "Under these flattering prospects and promises, asveral American commercial houses at Besten, San Francisco, and China rent cut agents to reside Nicholaefsky, a lewn or settlement then first projected on the north bank of the Amoor, 125 miles above the entrance of the river. Lands or building lote were freely granted to these agents—dwelling bouses, stores, and warehouses were immediately erected at a heavy expense. American capital to the amount of half a million of dollars was invested by vessels, cargoes, and buildings in view of the trade of that country. The frame and machinery of a steam bust of light draught of water was prejected to be weg, out from Boston-all intended for river navigation. After employment for three years past of all tais capital, hard labor, and the rivations endured incident to a new, wild, inhospitable country, without inhebitants, exampt the roving tribes of the Manchoos, Mongols, and Tarture, and the sparce population of lately emigrant Enssists, American merchants have realized no

It is manifest, as the writer adds, that the present effect of the new regulations is in throw into the hands of the faw Russian serchants at Nicholoscaky American merchandise, teembosts, and huildings, at Late their actual cost. The wrong to aur citizens resulting from this piece of Russian faithleseness will be gross and keeu; but this is not all. The gravamen of our complaint against Russle in this matter, however, is confined to the positive wrong dose to our citizens. This wrong Russia should be called to account for without delay. She cught to be made to answer for it strictly and in good earnest. Justice and self-respect demand it; and not them alone, but decency also. Indeed, the Administration at Washington mass hold Russia to a rigorous accountability in this affair or else stand discussed in the even of the world for this world has raced in the eyes of the world; for the world has not forgetten the factor, if it has, it will presently recall it—that we lately sent out a formidable ax-pedition to thrash a poor little South American Remblic for doing on the Paregusy not only cosentially but almost outright what the great Russian empire has now done on the Amoor; a smally, holding out peculiar inducements to the immigration and settlenent of American citizens, and then confecating their property, directly or indirectly, as soon as they vielded to the inducements. What is sauce for the President is sauce for the Czar. We advise the Ad-

ministration to liquire into this subject and exact ample justice in the premises, if it would shield itself from the general econo of mankind. When it does this we may possibly have an opportouity of seeing how much the current imp t 1 which we have alluded is worth. Wa shall learn this blushing young Republic are reciprocated by the atom and cold despot of the North.

The Democrat of Saturday refers to the coions movement at Harper's Forry as "the recent gra insurrection," characterizing it as "the ond which has countred since the foundation of or Government," thus classing it with the Southampton insurrection of 1831. This is all wrong. The affair at Harper's Farry, as everybody is now aware, was not a "negro insurrection" at all; and it is obviously most indiscreet and improper to represent or misrepresent it as such. No doubt the thing is a simple insurertnessy on the part of our neighbor; but public journalists, in handling quections of this nature, cannot be too cautions. Every man of judgment and discretion in the South must see the impropriety of investing this crany and disbelical outbreak with a species of terrors which it haspily does not possess.
